

ScannTECH 303k the quick top view scanner

For digitalisation of colours, black-and-white or grey levels. The scanner can be simply extended to a copying solution. The scanner - the basic equipment of which contains also a book holder, TWAIN-drivers and the software PhotoShop Elements for image processing - convinces through its easy operation and the intuitive operation panel with symbol keys for most of the functions of scanning and image processing.

A foot switch is also part of the basic equipment - pushing the foot switch triggers the scan. Using TWAIN-drivers makes the ScannTECH 303k a versatile and easy to operate scanner, and the first-time set of of the scanner is very simple, too.

ScannTECH 303k+ - the copying station

With the copying software Tocola and a touch-screen monitor the scanner becomes a digital book-copying machine that can be operated easily. The scanned masters can be directly printed (scan-to-copy), stored on a USB-stick or on a USB-portable harddisk (scan-to-file) or be sent by e-mail (scan-to-e-mail).
