

Large Format Scanner WideTEK WT48

WideTEK WT48 - The new Large Format Scanner for documents up to 48inch width. Compatible with nearly every operating system. Device control by the integrated web based Scan2Net® user interface or directly at the scanner by using the keyboard and the TFT colour display.

Scanning speed: max. 6,6 inch/sec = 10 m/minute in full color
With optional "Fastpack".
Optical resolution: 200 - 460 dpi
Data formats:

- JPEG
- PNM
- TIFF
- TIFF G4

Color modes: Bitonal, 8 bit grayscale, 36 bit color

Designed for ease of use:

Placing the cameras above the document table allow the user to scan documents face-up. The large document table with antifriction structure in combination with the adjustable alignment ruler ensures optimum transport of the documents. Insert the document and start - high scanning speed without stop-and-go provides high document throughput.

Future-proof by its modular concept:

The basic model with 36 inches scanning width can easily be adapted to 42 or 48 inches scanning width.
